Background Issues Papers

Introduction

A series of background papers have been prepared to support the Pre-Submission Site Allocations DPD. These are as follows:

- **The Sustainable Development Strategy:**
 - (a) Green Belt, Rural Area and Settlement Boundaries
 - (b) Transport

- **Strengthening Economic Prosperity**

- **Providing Homes and Community Services**
 - (a) Providing Homes
 - (b) Social Infrastructure

- **Looking After the Environment**

These papers form part of the evidence base. Their role is to inform the content of the Site Allocations DPD through:

- (a) summarising background policy, guidance and advice relevant to each subject area; and
- (b) assessing which sites, designations and/or boundary changes it is appropriate to take forward in the context of this advice and set out any additional selection criteria used.

Information has been collected from a number of different sources and as the assessment has been an interactive process, incorporating the conclusions of sustainability appraisal and advice from technical experts as appropriate (see Figure 1).

Notes:

1. The projected completions under the 'Defined sites' will not tally with the respective totals in the schedules in the Pre-Submissions Site Allocations DPD. The figures have been adjusted to take into account progress on sites (e.g. planning approvals) and to avoid double counting future completions.
2. Totals for the projected completions under the 'Heart of Maylands' in the 'Defined locations' section have been adjusted to take into account progress on sites (e.g. planning approvals and applications), recent information, and to avoid double counting completions.
3. The previous contributions from 'Rural exceptions' sites has been removed from the table due to the difficulties in securing and delivering such schemes. However, proposals could still come forward (albeit in a more reduced scale) and thus contribute as future commitments.
4. 'Windfalls' also includes small new build and conversions/change of use sites in other locations such as undesignated employment sites, retail centres and rural conversions.
5. 'Windfalls' excludes any contributions from larger windfall sites, development on garden land and potential rural exception sites. However, such schemes could still contribute to the overall housing supply (e.g. as future commitments) and thus help ensure an additional buffer.

Dear

Long Marston Gypsy and Traveller site

I am writing on behalf of the planning department at Dacorum Borough Council to explore your views on the potential to expand the above traveller site into adjoining land, which I understand is within your ownership.

By way of background, the Government requires local authorities to similarly plan for the future accommodation needs of the traveller community as that of the settled community. To this end, the Council commissioned consultants to undertake such technical work which was completed in January 2013. The study identified the need for at least 17 additional pitches* up to 2031 to meet the needs stemming from existing travellers in the borough, including that arising in the Tring area from the Long Marston site. We are therefore legally obliged to demonstrate how we can plan to meet this need.

We have been exploring how we can actually accommodate this identified need through a planning strategy document called the 'Site Allocations'. This document is not yet in its final form, but the current version identifies a range of different sites to meet the future development needs of the borough, including potential locations for traveller sites.

The Council's preferred approach is to provide new traveller sites as part of large, new housing development. We are proposing that these new sites should only accommodate a modest number of pitches as general advice and best practice suggests that it is easier to accommodate and manage smaller sites.

The Site Allocations document is proposing that these new pitches are provided as part of three new greenfield housing sites, termed 'Local Allocations', located on the edges of Hemel Hempstead and Tring.

In the case of Tring, we are proposing a site comprising 5 pitches adjacent to Local Allocation LA5 located to the west of Tring on land that is currently in the Green Belt and Chilterns Area of Outstanding Natural Beauty. LA5 will provide for 180-200 new homes alongside the traveller site, a new cemetery and extension of the Icknield Way industrial estate.

The Council consulted on the Site Allocations document, and this approach to meeting traveller accommodation at LA5, during the Autumn of last year, which you may already be aware of. This consultation resulted in a significant level of local objections to the traveller site from residents and the developer who controls the LA5 site, Cala Homes. The Council will need to consider how it deals with such comments (and others to proposal LA5) and whether changes should be made to its approach as a result of concerns raised.

Some of those who objected to the LA5 site suggested that we should instead consider the option of expanding the existing Long Marston site. The Council therefore feels it is prudent to explore this option further.

Other alternative sites in the Tring area and beyond have proved difficult to identify in light of their general suitability to accommodate new pitches, continuing local objections and the uncertainty of securing the support of land owners. On this basis, the option to expand the existing Long Marston site to accommodate up to 5 additional pitches is a potential alternative. In order to achieve this expansion, we would need to purchase land in your ownership. We recognise that any extension would be a sensitive local issue given that the existing traveller site has remained unchanged for many years and that it has integrated itself relatively well with nearby residents.

The Council is also aware that there was an undertaking from the (then) County Secretary, in planning for the original site, not to increase its current size. Whilst such an undertaking is not legally binding, it is something which we will need to take account of.

We would therefore welcome your initial views on the possibility of expanding the Long Marston site and whether this is something we can explore further with you both. It is important that the Council understands your views as the landowners. We would stress that no decision has yet been made to take forward this option.

Please let me know if you require any additional information. We would of course be happy to meet with you to discuss this matter further.

If you would like to arrange to come to speak to us, or to discuss things further over the phone, please contact me on 01442 228383, or alternatively email francis.whittaker@dacorum.gov.uk.

Yours sincerely

Francis Whittaker

Dear Mr Whittaker,

With reference to your letter regarding the potential to expand the Long Marston Gypsy and Traveller site. This is something we would strongly oppose because of all the problems we have experienced over the last 40 years.

Part of the reason this site has integrated itself better than many others is due to its small size, which we were assured would not be expanded.

Yours sincerely
